

# APQS advantages

## EASY TO LEARN

You don't need to be an experienced quilter to use our machines. Our stitch regulator will reduce your practice time significantly and get you off to a great start with perfect stitches every time.

## FUN TO OPERATE

At APQS we truly believe that quilting should be fun! That is why our machines include numerous timesaving functions and features that allow you to quilt effortlessly for hours. Our numerous accessories empower you to be as creative as you want.

### Stitch regulator

Our stitch regulator is the most precise in the industry, using our exclusive Adaptive Logic Stitch Regulation™. It provides accurate stitches – where you want them, when you want them. Most stitch-regulated machines simply measure the distance moved. The APQS stitch regulator measures speed and direction to ensure superior stitch quality at all times, especially for stops and starts, making it perfect for points and corners.

### Lifetime Warranty

APQS longarm quilting machines are fully warranted to the original owner against defects in materials and workmanship for the lifetime of the product. If a machine ever fails due to a manufacturing defect, even after extended use, we will repair the machine, without charge, or replace it.

### Lifetime customer support

You're bound to have lots of questions about your new machine and how to use it. Whether you've owned your machine for a day or 20 years, we're here for you! Our trained Service Technicians are only a phone call away to help you troubleshoot and answer questions. And APQS customer support is available free for as long as you need us. In addition to our customer support team, APQS owners are one big, quilting family and they enjoy sharing inspiration and troubleshooting tips on our Facebook page, YouTube channel, website, blog and forums.

### Quilt Path™ computerized quilting system

Computerized quilting makes precision quilting easy. You design it, Quilt Path™ quilts it. Choose from a vast library of patterns or design your own. From simple pantograph quilting to custom quilt creation, it is all available at your fingertips with the Quilt Path™ touch screen tablet.

### Bliss™ track system

The Bliss™ track system eliminates resistance found in traditional longarm track systems. Our system provides smooth, effortless and easy movement allowing you to quilt for hours without feeling tired.

### Automatic quilt advance

This timesaving feature lets you advance your quilt with a foot pedal control or by the simple flip of a switch.

### Multi-positional handles

Our fully adjustable handles give you greater control for all styles of quilting. Customize the position of the handles for smooth meandering to precision micro stippling with controls right at your fingertips. Our exclusive handles extend your reach allowing you to comfortably access all areas of the quilt. In addition, this feature allows you to stand or sit while you quilt.

### Quilt Glide stitch mode

Get the best of both worlds by simultaneously combining manual and stitch regulated modes, giving you great cruise control and consistent stitches for detail quilting.

### Thread tensioner

Our disc-style tensioner provides the most superb thread delivery system, accommodating different thread weights and products with a simple adjustment.

### Synchronous belt drive

APQS carefully chose belt drive technology as the means of transferring power to the upper and lower shafts. This clean and quiet belt drive requires no grease, eliminating the potential to ruin your quilt. Ask any APQS owner and they will tell you that timing or re-timing is almost nonexistent. In addition, belt drive technology requires no lubrication, is quieter in operation and reduces vibration.

### Self-lubricating bushings

Our self-lubricating needle bar and hopping foot bushings provide smooth operation with no additional lubrication required. This innovative and timesaving feature minimizes maintenance by eliminating unnecessary oiling.

### Smart Bobbin™ or Big Bobbin options

Our low inertia Smart Bobbin™ provides precise thread tension, outstanding stitch quality and allows the use of almost any thread. The Big Bobbin allows for more time spent quilting between bobbin changes.

### Adjustment-free quilt take-up roller

The APQS table design eliminates the need for pick-up roller adjustments or lifting. We have a four-bar system featuring a leveling bar, eliminating the need to adjust the height of the take-up bar.

### Low bobbin indicator

Know with certainty when your bobbin is about to run out. Our low bobbin indicator measures the amount of thread being used and can be reset to accommodate any weight of thread.

### Streamlined table design

The APQS table is full of great timesaving features. For example, the quilt top, batting and backing all load from the top. This simplifies bobbin changes and lets you quilt while sitting. Our tables do not have junction points in the rails or the poles allowing our wheels smooth movement and preventing sway.

### Timesaving features

Features such as the needle positioner, single-stitch button, bobbin thread cutter and hydraulic table lift provide hours of effortless quilting. Accessories like interchangeable hopping feet, rulers, specialty thread holders and many others empower you to be as creative as you want.

### Minimal maintenance

Our engineers have designed APQS machines to make them extremely user friendly as well as maintenance friendly. Simple oiling and routine cleaning are all that's needed to keep your machine working. The machines have been intentionally designed so that most service needs can be handled without the machine ever leaving your home.

### Top thread break sensor

Our sensor alerts you if the top thread breaks so you can quickly get back to quilting.
