# Don't mistake Larry's economical price for trimmed back.

Larry is the first family member of our new economy line of quality longarm quilting machines. He also happens to be our smallest. But don't mistake economical for trimmed back. Larry has the features APQS is known for and is backed by the unmatched APQS lifetime guarantee.

### Standard table

The APQS standard table is full of great time-saving features and comes in 8', 10' or 12' table lengths. For example, the quilt top, batting and backing all load from the top. This simplifies bobbin changes and lets you quilt while sitting. Our tables do not have junction points in the rails or the poles, which gives our wheels smooth movement and prevents sway.

### Available options for Larry

- Bliss™ track system
- Hydraulic table lift
- In-home set-up by factory-certified technician
